

Areas of Research:

Aging
Alternative medicine
Bacteriology
Biochemistry
Bioethics
Biophysics
Blood cancer
Cardiovascular
Cell biology
Dental science – oral biology
Drug research
Endocrinology
Environmental influences on health
Ethics
Gastrointestinal (liver)
Genetics
Genomics, proteomics, and bioinformatics
Geriatrics
Gerontology
Health research
Health services research
Hearing
Imaging
Immunology-transplantation
International health
Mental health
Metabolism/diabetes
Molecular biology
Muscle, bone, or joint
Nervous system
Not classified
Nursing
Nutrition
Population health
Psychosocial/health behavioural res.
Renal function, nephrology, urology
Reproduction/pregnancy
Respiration
Societal & cultural dimensions of health
Virology
Vision
